They want to start using the Microsoft Dynamics CRM Online 2016 features. The company needs to determine the least costly method of migrating data from on-premises to online. It is determined that the client wants to move the account and contact information only one time while preserving the relationships between the two entities. Additionally, there are several custom fields in the contact records. You need to migrate 5,000 account records and 14,000 contacts while maintaining the relationships between accounts and contacts. What is the most expedient method for migrating the accounts and contacts records? A. Use the Software Development Kit (SDK) to code the import of contact and account data from the AccountBase directly accessed through the local Microsoft SQL Server. Use the Data Web service to form a connection with Microsoft Dynamics CRM Online. Push the gathered information into the Account entity. B. From Microsoft SQL, export the contact records from the AccountBase table to a text file. Import the contacts first using the Data Import Wizard. Repeat the process with the Accounts file. C. Export the contact records and account records to Microsoft Excel, compress the Excel spreadsheet in a zip file, and use the Data Import Wizard to import the records. D. Export the contact records and account records to Microsoft Excel with all required fields. Save the two spreadsheets as text files, compress them together in a zip file, and use the Data Import Wizard to import the zip file. Answer: C Explanation:
