[2017 October Microsoft Official New Released 70-740 Q&As in Lead2pass.com! 100% Free Download! 100% Pass Guaranteed!](#)

Test your preparation for Microsoft 70-740 with these actual 70-740 new questions below. Exam questions are a sure method to validate one's preparation for actual certification exam. Following questions and answers are all new published by **Microsoft** Official Exam Center: <https://www.lead2pass.com/70-740.html>

QUESTION 101 Which container type is described below: Provides application isolation through process and namespace isolation technology. This container shares a kernel with the container host and all containers running on the host. A. Hyper-V Container B. Windows Server Container Answer: B

QUESTION 102 Your IT company is constantly changing, with new users coming and going throughout the year. One of your common tasks requires the deletion of user accounts for employees who have left the company. Which command can be used to delete user accounts? A. LDIFDE B. Dismod C. Dspromo D. Netsh Answer: A

QUESTION 103 One of your team previously opened Hyper-V Manager, selected a virtual machine and followed the Enable Replication wizard. The process was completed successfully and replications were occurring as expected. Several weeks later and you now want to run a planned failover. Which of the following steps is the correct starting point? A. Right-click the primary vM and select Replication > Planned Failover B. Right-click the replica vM and select Replication > Planned Failover C. Right-click the primary VM and select Replication > Extend Replication D. Right-click the replica VM and select Replication > Test Failover Answer: A

QUESTION 104 You have just finished installing Windows Server 2016 on a new server. Your colleague has informed you that its essential that you must activate Windows Server. Which of the following command line tools can be used to Activate Windows Server? A. Netdom C:windowssystem32slmgr.vbs -ato B. Netsh C:windowssystem32slmgr.vbs -ato C. Ocsetup C:windowssystem32slmgr.vbs -ato D. Cscript C:windowssystem32slmgr.vbs -ato Answer: D

Explanation: The correct answer is Cscript C:windowssystem32slmgr.vbs -ato

QUESTION 105 With Nano Server some packages are installed directly with their own Windows PowerShell switches (such as -Compute); others you install by passing package names to the -Packages parameter, which you can combine in a comma-separated list. You want to add IIS to your Nano Server, which command should you use? A. -Compute B. -Packages C. -Containers D. -Storage Answer: B

Explanation: IIS is added by using -Packages Microsoft-NanoServer-IIS-Package.

QUESTION 106 In response to increased needs for higher density and more efficient OS resource utilization, Nano Server is foundational to the modern datacenter and is useful in two core scenarios: As a private cloud infrastructure it's particularly useful for clustered Hyper-V, clustered storage and core networking services scenarios; or as an application platform it's highly optimized for modern distributed and cloud-based apps which leverage containers and micro service architectures. Is the following statement TRUE or FALSE? A local interface with UI support is available for offline management of Nano Servers? A. TRUE B. FALSE Answer: B

Explanation: A local interface with UI support is NOT available for Nano servers. You must administer them remotely using PowerShell.

QUESTION 107 The Host Guardian Service supports two different deployments of a Guarded fabric (attestation modes). The statement below describes which mode? Guarded hosts that can run Shielded VMs are approved based on their identity, measured boot sequence and code integrity policies so that you can ensure that these hosts are only running approved code. A. Admin-trusted attestation B. TPM-trusted attestation Answer: B

Explanation: TPM-trusted attestation offers the strongest possible protections but also requires more configuration steps. Host hardware and firmware must include TPM 2.0 and UEFI 2.3.1 with secure boot enabled. TPM trusted attestation is the mode Microsoft recommend that you use because it offers stronger assurances but it requires that your Hyper-V hosts have TPM 2.0.

QUESTION 108 Virtual Network Manager (available from the Hyper-V Manager snap-in) offers three types of virtual networks that you can use to define various networking topologies for virtual machines and the virtualization server. Which type of virtual network is isolated from all external network traffic on the virtualization server, as well any network traffic between the management operating system and the external network. A. Private virtual network B. Internal virtual network Answer: A

QUESTION 109 You have decided to install Windows Server 2016 by choosing the Service Core Installation option. If you want to install, configure or uninstall server roles remotely, what tool would you use? A. Any of these B. Windows PowerShell C. Remote Server Administration Tools (RSAT) D. Server Manager Answer: A

QUESTION 110 When you create a new SET team, you must configure the following team properties: Member adapters and Load balancing mode. Which Load balancing mode ensures that outbound loads are distributed based on a hash of the TCP Ports and IP addresses. This mode also re-balances loads in real time so that a given outbound flow can move back and forth between SET team members. A. Dynamic B. Hyper-V Port Answer: A

These Microsoft 70-740 exam questions are all a small selection of questions. If you want to practice more questions for actual 70-740 exam, use the links at the end of this document. Also you can find links for 70-740 VCE software that is great for preparation and self-assessment for Microsoft 70-740 exam. 70-740 new questions on Google Drive:
